Properties of Restol™

Protection against the sun

Protection against moisture

Protection against ageing

Water-repellent

No sanding required

Brush, roller and spray

Touch-dry in 4 to 6 hours

Silk finish

Approx. 12 - 16 m²
coverage per liter

Easy & versatile

Apply Restol™ in three simple steps:

1. Preparation

Ensure that the surface is not flaky and that it is dry and free of dust. We recommend you use a (wire) brush for this.

2. Application

Apply Restol™ Wood Oil using a flat brush, roller or by spraying. For the best results, apply Restol™ along the length of the wood.

3. Second/third coat

Two coats of Restol™ provides adequate protection. For a brighter color, give wood a third coat.

Colors in images may differ from actual colors. The final appearance of Restol™ on your wood will depend on the type of surface and the number of coats applied.

Your Restol™ expert:

Restol™ Wood Oil is based on natural (vegetable) linseed oils, making it water-repellent and weather-resistant. It protects your external wood for years to come.
